Turbine Capital
Parts Video

MD&A stands ready to serve your gas turbine fleets. We are a premier worldwide supplier of replacement gas turbine parts & components.

Quick Links

Greetings!

We are proud to be in our 35th year and proud of our growth! We are easy to work with. We provide immediate access to expert help when you need it, where you need it. One call, one source, *powerful solutions!*

DFLP Rotor Straightening & Machining

MD&A straightened and machined a double flow low pressure (DFLP) rotor, after it arrived with both shaft ends bent due to a loss of lubricating oil event.

[Click here to see our Resource Center on our website](#) for our case study example.

Turbo Parts and RPM Name Changes

We are pleased to announce that [Renewal Parts Maintenance & Turbo Parts are coming under the MD&A brand.](#)

They will both operate with the same address and phone numbers.

Renewal Parts Maintenance will change its name to **MD&A Bearings, Seals & Hydraulics Division**, and continue to be the power industry's trusted partner for refurbishing, designing and manufacturing high-quality turbine bearings.

[Careers with MD&A](#)

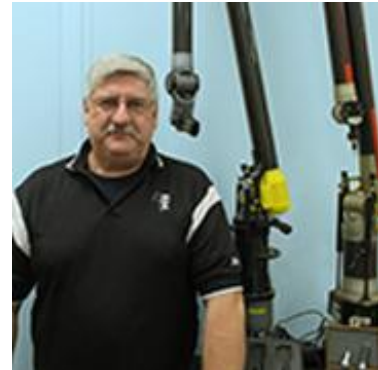

Turbo Parts, LLC will change its name to **MD&A Parts Division**. It will continue to offer the service quality that has made the division a leading domestic and global supplier of after-market turbine parts and components.

Meet the Experts: Monty Wilder

MD&A would like you to Meet one of our Experts! Read the Q&A with [Monty Wilder](#), Generator Engineering Support Manager, who reverse engineers generator parts. Also, his favorite project of creating a spreadsheet driven CAD model of the generator field assembly.

Also, read all of our experts under each blue division title on our website under Resource Center under [Meet the Experts](#).
